A complementary program designed to recognize builders who are building quality, energy efficient homes

AND

Provide buyers with energy efficient, quality tested homes
Why it’s important

– Community Steward for SRP customers
– Reduce future resource needs
– SRP’s sustainable portfolio - 30% contribution
Currently...
- 40 builders
- 150 local communities
- 26,650 homes

Qualifications
- Designed for Builder Flexibility
  - 13 SEER or better HVAC
  - 90 or less HERS index by Certified Energy Rater
  - Communities of 20 or more homes
Builder Benefits
SRP covers all the costs for 3rd Party Testing, Plan Analysis, and Energy Code Compliance Certificates
- Frame in Stage
  - Duct Leakage Test
  - Insulation Inspection
- Final Stage
  - Building Envelope Leakage Test

Grade 1 Insulation required - Insulation installed without gaps, voids, or compressions
Duct Blaster Testing
An SRP PowerWise home is tested to confirm leakage less than 6%.

Blower Door Testing
Utility Estimates

Delivering more than power™
Lasting Value of Energy Efficiency

The value of most design features will become obsolete however...

• The value of energy efficient features increases over time.
